Re: Impact of the International Symposium on Energy

Dear Dr. Tan,

I am a member of the Conference Scientific Committee of the International Symposium on Energy. The mission of the symposium series is to facilitate the multidisciplinary study of energy challenges from an international perspective. New trends and new ideas are being developed at the Committee Meeting.

At the 6th International Symposium on Energy Challenges and Mechanics (Inverness, 2016) I delivered an Invited Lecture "Catalytic bi-reforming of methane using Ni-based pyrochlores". This is a new research with applications in alternative and clean energy and I look forward to working with you in the future.

Yours Sincerely,

James Shiver and Clarence Eidt Professor  
Chemical Engineering  
Louisiana State University  
Baton Rouge, Louisiana, USA
